Q: I need to rent a dance floor, what size will I need?
A: Dance floor sections come in 3 x 3 foot sections. Each section costs $12.00 each. Below is a quick dance floor calculator and a list of sizes and sections to help you plan your event:

Calculating What Size Floor You Need For Your Event

Determine What Size Floor You Need
A good rule of thumb for planning an event: 30% of the total number of guests will be on the dance floor at any given time.

Option 1: How much space do you have?
Decide how much space you have for a dance floor. Or, many people use our portable flooring as a floor for the dining area, too. Either way, you will need precise measurements.

How to calculate square footage:
If you don’t know how to calculate square footage, here’s a little tutorial. Refer to the example dance floor on the right.

- Measure width and length of your floor. In the example, the width is 12ft (A) and the length is 18ft (B).

- To calculate the total square footage, use the formula AxB = total sq ft. In the example, 12ft x 18ft = 216 square feet

How to calculate the number of edge pieces and corner pieces you will need to finish off your dance floor:
Once you have calculated the size of your dance floor, you are ready to figure out how many edge pieces you will need.

- To calculate the total number of edge pieces, use the formula A+B+C+D = Total edging. In the example, 12+18+12+18 = 60 total edge pieces.

Note: this formula assumes that you require edge pieces on all 4 sides. Adjust accordingly if your dance floor will be against the wall or in a corner - which might eliminate your need for edging on all 4 sides.
Edging and corner pieces attach to the dance floor tile quickly and easily. The sloped edging provides a finished look and eliminates the tripping hazard.

**Option 2: How many guests will attend?**
If space is not an issue, use the chart below as a reference guide to what size dance floor you require.

<table>
<thead>
<tr>
<th>Total # of Guests</th>
<th>Total # of Dancers</th>
<th>Size of Dance Floor</th>
<th>Total # Sq. Feet</th>
<th>Total # of 3x3 Panels</th>
</tr>
</thead>
<tbody>
<tr>
<td>60</td>
<td>18</td>
<td>09t x 09ft</td>
<td>81</td>
<td>9</td>
</tr>
<tr>
<td>100</td>
<td>30</td>
<td>12ft x 12ft</td>
<td>144</td>
<td>16</td>
</tr>
<tr>
<td>150</td>
<td>50</td>
<td>15ft x 15ft</td>
<td>225</td>
<td>25</td>
</tr>
<tr>
<td>200</td>
<td>72</td>
<td>18ft x 18ft</td>
<td>324</td>
<td>36</td>
</tr>
<tr>
<td>275</td>
<td>98</td>
<td>21ft x 21ft</td>
<td>441</td>
<td>49</td>
</tr>
<tr>
<td>400</td>
<td>140</td>
<td>25ft x 25ft</td>
<td>625</td>
<td>69</td>
</tr>
</tbody>
</table>

**Key Features of the portable dance floor:**

- Lightweight and easily portable – Only 18 lbs per 3’ x 3’ panel
- Engineered for both indoor and outdoor use – It’s 100% waterproof and resistant to warping and staining.
- Installation is a “SNAP”! No tools required – simply “snap” together to form any size custom floor
